## Profile

I am an aspiring developer with a background in Django and machine learning. With a track record of developing and deploying web applications using Django, I possess a deep understanding of web development frameworks and database management. Additionally, my expertise in machine learning encompasses building and optimizing predictive models, data analysis, and implementing various algorithms to solve complex problems.

## Education

### Master of Computer Application

College of Engineering

2023 – 2025

Trivandrum, India

### BSc Computer Science

University Institute of Technology

2020 – 2023

Yeroor, India

### Higher Secondary

KTCTEMHSS

2020

Kaduvayil, India

## Skills

Python

Machine Learning

Java

Django

PHP

HTML

CSS

Javascript

## Languages

English • Malayalam • Tamil • Hindi

## Projects

### Advanced Motor Spa - Webpage Development

Advanced Motor Spa is to automate the complete operations of the vehicle service center. The system is used in vehicle service to minimize the management process. The system was built with the help of Python Django and MySQL as its Database

### Heart Disease Prediction using Machine Learning

Developed a Heart Disease Prediction System using Machine Learning techniques, Sklearn for numerical computing, Pandas for data manipulation. The model achieved an accuracy of 98% in Confusion Matrix

## **Additional Qualification**

---

### **National Service Scheme**

Participated in the National Service Scheme (NSS) during Higher Secondary, dedicating 2 years to community service and social development initiatives.

Attended a 7-day camp at the end of the program, engaging in awareness campaigns, workshops, and community outreach projects.

## **Interest And Hobbies**

---

### **Sports**

Cricket

Football

Badminton

### **Arts**

Pencil Drawing

Singing

### **Esports**
